

## Roofing Installation Information and Certification for Reduction in Residential Insurance Premiums

**Notice to Homeowner.** Completion of this certificate may entitle you to a reduction in your residential insurance premium. This certification form is solely for the purpose of enabling residential property owners to apply for a reduction in their residential insurance premium and it is not to be construed as any type of express or implied warranty by the manufacturer, supplier, installer, State Farm Fire and Casualty Company or State Farm Lloyds. Premium reductions are not available for roofs (other than qualifying metal roofs) that have been overlaid onto existing roofs.

Note: To receive a premium reduction for qualifying metal products, you must accept an exclusion of certain damages to metal roof products outlined in an endorsement that will be a part of your policy. You have a choice whether to request the premium reduction and accept the exclusion of damages to metal roofs. Submission of this form to State Farm is one part of your request and your acceptance of the exclusion of damages. See your agent for details. (Exception: metal roofs are not eligible for this premium reduction in Wyoming.)
